Aloha FRMD,

Happy Monday and I hope everyone had a lovely weekend!

As a follow up from our discussions at the FRMD All Hands last month and the subsequent solicitation of interest for the new FRMD leadership opportunities a few weeks ago, we are elated to announce that as of today (Monday, November 18, 2024) we are officially operating under the new FRMD Branch Structure.

The new Fisheries Monitoring Branch (FMB) will consist of the Data In, Data Out, and Electronic Technologies Programs (program names subject to change). Jenny Suter is the Branch Chief for the Fisheries Monitoring Branch. We are also excited to announce that Brad Gough has been selected as the new Program Team Lead for the Data In Program and Ashely Tomita has been selected as the new Program Team Lead for the Data Out Program. Congratulations to Ashley and Brad! Keith Bigelow will remain the Supervisory Program Lead for the Electronic Technologies Program until his retirement at the end of December.

The new Assessment and Research Branch (ARB) will include the Life History Program (LHP), Oceanic Fisheries Stock Assessment Program (OSAP), Island Fisheries Stock Assessment Program (ISAP) and lead for Surveys, Ben Richards. Felipe Carvalho is the Branch Chief for the Assessment and Research Branch. Eva Schemmel is the Supervisory Program Lead for the Life History Program. As discussed previously, the full job announcement for the two Supervisory Program Lead positions for OSAP and ISAP will be sent out in January, with an anticipated March hire date. In the interim, we are offering an opportunity for a number of individuals to take on a temporary detail to serve in this role. We are excited to announce that Michelle Sculley and Nicholas Ducharme-Barth have been selected to detail as the Program Lead for OSAP, and Honguang Ma, Marc Nadon, and John Syslo have been selected to detail as the Program Lead for ISAP. Each will serve a 60-day detail. Congratulations to all of you! Once again, the full job announcement for the two supervisory positions in ARB will be sent out in January 2025, with an anticipated March hire date.

A full org chart of the new branch structure is attached here for your reference. We are very excited about these changes. We hope this new structure will allow us to relieve some pressure points and operate more effectively as a Division.

As always feel free to reach out to Emily, T.Todd or your Supervisor with any questions.

Have a great week, all!!

Best,
-Emily & T.Todd
