Dear PIFSC Team,

We wanted to quickly acknowledge that the Senate has passed a continuing resolution, and a lapse in appropriations is not expected.

Thank you to everyone that helped support readying the Center for the potential shutdown. And mahalo to all of you who steadfastly continued the important work despite these significant distractions.

On behalf of the US taxpayers we also want to say good job…but don't take our word for it, take theirs. Here is a snippet of some of the comments coming in over our social media channels:

- Thank you, NOAA, for your work to keep our seafood supply healthy, plentiful, and safe!
- Stay the course. Your work is our future.
