Aloha Folks,
You may have heard I will be retiring from PIFSC on Apr 30th. The Ecosystem Sciences Division has a great team of capable people who will step up to act as the Division Director as needed. We thank Dr. Ryan Rykaczewski who has volunteered to be first up to represent the division in the coming months.

If there is a need to contact me in my retirement (e.g. for insight on some discovered obscure reference or a strange object found in storage) my cell phone is the same as listed on this email and my new email is Fparrish2000@gmail.com

In my 39 years at NOAA I have always been proud to answer the question of what I do for a living. I enjoy describing the excellent multidisciplinary work of NOAA professionals whose passions have drawn them to our unique public service mission. Once retired, that answer will of course be in the past tense, but the pride will always be there.

Thanks
Frank
